MATHEMATICS

February 19, 2025

Greetings,

A very special day is coming up this April-Earth Day. In recognition and celebration of this occasion, we are organizing a community event at Dillard University to educate and bring greater awareness of environmental protection to the community and want to invite you to participate.

On Tuesday April 22, 2025 starting at 11:00 a.m., Our Earth Day Celebrations will feature Earth Day awareness classes. We will also be hosting environmental educational workshops and Eco Living sessions where participants can learn about efficiency, energy saving and clean planet. In addition, we will provide training on recycling guide. Arts and crafts activities will also be available for all children. As a small step to protect our environment, we will cultivate a garden where we be planting a variety of vegetables, herbs, and flowers.

We would love to have you join us. Please RSVP at rbroadway@dillard.edu by April 14, 2025 whether it will be possible for you to attend this very special event.

Together, we can make our planet greener and healthier. We hope you will join us on Tuesday April 22. Happy Earth Day!

Sincerely,

Ruby Broadway
